

Work Bench Assemblies

Work benches for assembly and adjustment of tools

Ideal work station for assembly, adjustment and maintenance of N/C tools and equipment.

The assembly station in the Tool Room has to be provided with all the necessary equipment to assemble, disassemble and adjust both the tools and the racking if downtime on the machines is to be reduced considerably. The work bench top is 1-3/4" wood welded maple. The lower cabinet is provided with sliding drawers on ball bearings. A central closing system locks all the drawers.
